

100MW WPP Wind Power Plant + GOV PPA

MERGERSCORP

100MW WPP Wind Power Plant + GOV PPA

Wind power is swiftly becoming a popular source of clean and renewable energy around the world, and Kazakhstan is no exception.

This 100MW Ready to Build WPP Wind Power Plant is located in a prime wind energy region in Kazakhstan, where the strong and consistent winds make it an ideal location for harnessing wind power. The plan consists of a series of wind turbines that are capable of generating 100 megawatts of electricity, enough to power thousands of homes and businesses in the surrounding area.

One of the key factors that has contributed to the success of the 100MW WPP Wind Power Plant is the government Power Purchase Agreement (PPA) that has been put in place. A PPA is a contract between a power producer and a utility company or government entity that outlines the terms of the sale of electricity generated by the plant. In the case of the 100MW WPP Wind Power Plant, the government of Kazakhstan has signed a PPA that guarantees a fixed price for the electricity produced by the plant, providing the necessary financial security for investors and allowing the plant to operate profitably.

The government PPA is a crucial component of the renewable energy industry in Kazakhstan, as it provides a stable and predictable source of revenue for wind power plants like the 100MW WPP. This has helped to attract investment in the development of wind power projects, leading to the rapid growth of the industry in the country.

In addition to the financial benefits, the 100MW WPP Wind Power Plant also provides numerous environmental advantages. By generating electricity from wind power, the plant helps to reduce greenhouse gas emissions and combat climate change. This is especially important in Kazakhstan, where the government has set ambitious targets for reducing carbon emissions and increasing the share of renewable energy in the country's energy mix.

Furthermore, the 100MW WPP Wind Power Plant also has a positive impact on the local economy. The construction and operation of the plant create jobs and stimulate economic growth in the surrounding area.

Status

- Ready to Build

Keypoints

- The 100MW wind farm construction project in Zhezkazgan was won at the auction of the Ministry of Energy of the Republic of Kazakhstan for a renewable energy sources (RES) project in Kazakhstan in the fall of 2022.
- The Contract (PPA) was concluded for the purchase of electrical energy by the settlement and financial center from energy producing organization using renewable energy sources at an auction price of 12.39 tenge / kWh (excluding VAT), valid for 20 years from the start of generation.
- The annual indexation of the auction price is carried out in the manner prescribed by the Rules for determining fixed tariffs and marginal auction prices

PPA is provided by RFC LLP "Settlement and Financial Center for Support of Renewable Energy Sources" of the Ministry of Energy of the Republic of Kazakhstan. It carries out centralized purchase and sale of electric energy produced by facilities for the use of renewable energy sources and supplied to the electric networks of the unified electric power system of the Republic of Kazakhstan.

The creation and development of LLP "Settlement and Financial Center for the support of renewable energy sources" is connected with the adopted course of the Republic of Kazakhstan on the development of the renewable energy sector (hereinafter – RES). In order to create conditions for the development of the renewable energy sector, a state support mechanism was adopted based on the introduction of centralized purchase by a single buyer – the settlement and financial center of electric energy produced by renewable energy facilities.

- 2.39 tng/kWh
- 20 years
- 100% purchase

Construction Plan

1. It is planned to build 16 6.25MW wind turbines
2. Plan to build 30km of 35kv collector lines
3. It is planned to build a 220kv booster station
4. It is planned to build 15km of roads within the site and expand the original roads by 5km.
5. It is planned to build a transmission line of 0.3km

Main Indicators

Available power: 100,8 MW

Average wind speed measured on site (19.06.2021-18.06.2022) at a height of 100 m above the ground: 7,84 [m/s]

Long-term average wind speed at 100 m above ground: 7,75 [m/s]

Gross annual electricity supply, thousand: 434,325 kWh

Supply of electricity to the power grid, thousand: 372,792 kWh

Losses: thousand 61,533: kWh/year

The information contained herein does not constitute an offer to sell or a solicitation of an offer or a recommendation to purchase securities under the securities laws of any jurisdiction, including the United States Securities Act of 1933, as amended, or any US state securities laws, or a solicitation to enter into any other transaction

The projected financial information contained in the Memorandum is based on judgmental estimates and assumptions made by the management of the target Company, about circumstances and events that have not yet taken place. Accordingly, there can be no assurance that the projected results will be attained. In particular, but without prejudice to the generality of the foregoing, no representation or warranty whatsoever is given in relation to the reasonableness or achievability of the projections contained in the Memorandum or in relation to the bases and assumptions underlying such projections and you must satisfy yourself in relation to the reasonableness, achievability and accuracy thereof.

By delivering this Memorandum, neither MergersUS Inc., nor its authorized agents are making any recommendations regarding the acquisition or strategies outlined herein. Interested parties shall exercise independent judgment in, and have sole responsibility for, determining whether an acquisition of the Company is suitable for them, and neither MergersUS Inc, nor its authorized agents have responsibility to, and will not, monitor the condition of interested parties to determine that an acquisition is or remains suitable for them. Among other things, suitability of an acquisition will depend upon an interested party's investment and business plans and financial situation.

This document is prepared for information purposes only. It is made available on the express understanding that it will be used for the sole purpose of assisting the recipients to decide whether they wish to proceed with a further investigation of the Proposed Transaction.

The recipients realize and agree that this document is not intended to form the basis of any investment decision or any other appraisal or decision regarding the Proposed Transaction, and does not constitute the basis for the contract which may be concluded in relation to the Proposed Transaction.

All information contained in this document may subsequently be updated and adjusted. MergersUS Inc. has not independently verified any of the information contained herein or on which this document is based. Neither the Company, nor its management or shareholders, nor MergersUS Inc. , nor any of their respective directors, partners, officers, employees or affiliates make any representation or warranty (express or implied) or accept or will accept any responsibility or liability regarding or in relation to the accuracy or completeness of the information contained in this document or any other written or oral information made available to any interested party or its advisers. Any liability in respect of any such information or any inaccuracy in or omission from the document is expressly disclaimed.
