

6.40MW Italian PV Solar Photovoltaic Power Plant

6.40MW Italian PV Solar Photovoltaic Power Plant

Photovoltaic projects in Campania, a region located in the southern part of Italy, have gained significant traction in recent years. With its abundant sunlight and favorable climate conditions, Campania has emerged as a prime location for the development of photovoltaic projects.

One of the most notable photovoltaic projects in Campania is the Montalto di Castro photovoltaic power station. This massive solar farm covers an area of over 350 hectares and has a generating capacity of 84 MW. It is one of the largest photovoltaic projects in Italy and has helped to significantly increase the region's renewable energy capacity.

Another important photovoltaic project in Campania is the Benevento Solar Park, located in the province of Benevento. This solar park covers an area of 40 hectares and has a generating capacity of 10 MW. It provides clean and sustainable energy to the local community and helps to reduce carbon emissions in the region.

The development of photovoltaic projects in Campania has been driven by both governmental policies and private investment. The Italian government has set ambitious targets for the production of renewable energy, and photovoltaic projects play a key role in achieving these goals. In addition, the region of Campania offers incentives and subsidies for the development of photovoltaic projects, making it an attractive destination for investors.

Private companies have also played a significant role in the development of photovoltaic projects in Campania. With the cost of solar panels decreasing and the efficiency of photovoltaic technology increasing, more and more companies are investing in solar energy projects in the region. These companies not only benefit from the financial incentives provided by the government but also contribute to the transition towards clean and sustainable energy sources.

The growth of photovoltaic projects in Campania has had a positive impact on the local economy. The development of solar farms has created jobs in the region, both during the construction phase and in the operation and maintenance of the projects. In addition, the increased production of renewable energy has helped to reduce the region's dependence on fossil fuels, leading to a more sustainable energy system.

Keypoints

PV-1

Municipality: TBA

Suitable land area: approximately 12,635 ha

Rated power (AC): 6,390.0 kWac

Peak power (DC): 7,182.0 kWdc

Installation type: On the ground with mono axial tracker

Solar resource Global horizontal irradiation: 1,688.5 kWh/m²

Energy yield: (year 1)

Specific production: 1,870.7 kWh/kWp

Performance: Ratio 84.68 %

Total energy injected (year1): 13.44 GWh YEAR

Construction cost/MW €750,000.00/MW

Connection times and costs 137 working days / €178,556.73

Pricing

Total surface area: approximately 12,635 ha: Value of the land €920,000.00

Purchase of "Ready to Built" design: Value at MWac including commissions
€140,000.00/MWac

The information contained herein does not constitute an offer to sell or a solicitation of an offer or a recommendation to purchase securities under the securities laws of any jurisdiction, including the United States Securities Act of 1933, as amended, or any US state securities laws, or a solicitation to enter into any other transaction

The projected financial information contained in the Memorandum is based on judgmental estimates and assumptions made by the management of the target Company, about circumstances and events that have not yet taken place. Accordingly, there can be no assurance that the projected results will be attained. In particular, but without prejudice to the generality of the foregoing, no representation or warranty whatsoever is given in relation to the reasonableness or achievability of the projections contained in the Memorandum or in relation to the bases and assumptions underlying such projections and you must satisfy yourself in relation to the reasonableness, achievability and accuracy thereof.

By delivering this Memorandum, neither MergersUS Inc., nor its authorized agents are making any recommendations regarding the acquisition or strategies outlined herein. Interested parties shall exercise independent judgment in, and have sole responsibility for, determining whether an acquisition of the Company is suitable for them, and neither MergersUS Inc, nor its authorized agents have responsibility to, and will not, monitor the condition of interested parties to determine that an acquisition is or remains suitable for them. Among other things, suitability of an acquisition will depend upon an interested party's investment and business plans and financial situation.

This document is prepared for information purposes only. It is made available on the express understanding that it will be used for the sole purpose of assisting the recipients to decide whether they wish to proceed with a further investigation of the Proposed Transaction.

The recipients realize and agree that this document is not intended to form the basis of any investment decision or any other appraisal or decision regarding the Proposed Transaction, and does not constitute the basis for the contract which may be concluded in relation to the Proposed Transaction.

All information contained in this document may subsequently be updated and adjusted. MergersUS Inc. has not independently verified any of the information contained herein or on which this document is based. Neither the Company, nor its management or shareholders, nor MergersUS Inc. , nor any of their respective directors, partners, officers, employees or affiliates make any representation or warranty (express or implied) or accept or will accept any responsibility or liability regarding or in relation to the accuracy or completeness of the information contained in this document or any other written or oral information made available to any interested party or its advisers. Any liability in respect of any such information or any inaccuracy in or omission from the document is expressly disclaimed.
