

Swiss SRO Licensed VASP

MERGERSCORP

Swiss SRO Licensed VASP

A rare opportunity to acquire a fully approved Swiss crypto-financial company structured for immediate deployment under current regulatory standards. The entity has been intentionally maintained in a non-operational state to preserve a clean compliance profile and eliminate legacy risks.

This is not a licensed shell company. It is a fully structured, regulator-ready platform capable of supporting a broad range of crypto and fiat financial services.

Key Highlights

- Active Swiss SRO affiliation with a VASP framework aligned with 2026 regulatory requirements.
- No operational history and zero AML exposure, eliminating legacy compliance risks.
- Fully implemented AML, compliance, and corporate governance framework, independently audited.
- Swiss-resident Director and Compliance Officer in place, meeting all regulatory requirements.
- No historical banking relationships, customer activity, or transactional footprint, allowing the acquirer to implement its preferred banking and payment infrastructure from a clean and unencumbered starting point.
- Broad business model validated through a formal Swiss legal memorandum confirming operations within the applicable regulatory perimeter.

Why This Opportunity Is Different

Most licensed entities available on the market:

- Are approved only for narrow or restricted business models.
- Require additional regulatory analysis before becoming operational.
- Lack fully implemented compliance and governance infrastructure.
- Carry historical AML, operational, or reputational exposure.

This opportunity offers:

- A broad, multi-service regulatory scope already validated by legal and compliance experts.
- A fully implemented compliance and governance framework.
- No legacy risk or historical exposure.
- Immediate deployment capability without restructuring or additional licensing work.

Strategic Value

- Eliminates a 5–8+ month regulatory approval timeline.
- Removes licensing uncertainty and execution risk.
- Enables immediate market entry and accelerated commercialization.
- Significantly reduces internal build-out costs and regulatory burden.

Positioning

This asset should be viewed as a ready-to-deploy regulated financial infrastructure company rather than a newly formed or partially developed licensed entity.
